CAREER OBJECTIVE

Computer Science graduate working at the intersection of digital marketing and technology. Currently serving as a full-time SEO Specialist for **Razib Marketing**, a US-based agency specialising in digital growth for independent and boutique hotels. Over four years of professional experience spanning SEO strategy, content creation, client coordination, and cross-functional project execution — with hands-on exposure to automation, software testing, full-stack web development, and building production SEO tools. I bring technical understanding, analytical thinking, and communication skills that travel across industries and time zones. Looking for a growth-oriented team where curiosity is valued, problems are interesting, and good work creates measurable impact.

TECHNICAL EXPERTISE

- **Technical & Digital Skills:** SEO (On-page, Off-page, Technical), Hotel SEO, Local SEO, Entity SEO, AI Search Optimization (AEO, GEO), Content Strategy, Website Copywriting, Technical Writing, Digital Marketing.
- **Client & Team Coordination:** Client Communication, Requirement Gathering, Project Planning, Cross-team & Cross-timezone Collaboration.
- **Tools & Platforms:** Google Analytics (GA4), Google Search Console, Google Docs, Microsoft Office, Git/GitHub, Vercel, Render, Turso.
- **AI & Productivity Tools:** ChatGPT, Claude, Gemini, AI-assisted Research, Prompt Engineering, AI Workflow Design.
- **Software Knowledge:** Python, JavaScript, React.js, Node.js, MongoDB, SQL, Vite.
- **Testing & QA:** Selenium WebDriver, PyTest, Unit Testing, API Testing, Workflow Automation.
- **Other Skills:** Analytical Thinking, Problem Solving, Attention to Detail, Adaptability, Time Management.

FEATURED PROJECT

Hotel Schema Maker *React · Vite · Turso · Render*

2025 — Present

Live: <https://hotel-schema-maker.onrender.com/> | **Source:** <https://github.com/Shahriersaki/hotel-schema-maker>

A production web application that automates technical SEO for hotels. Rather than generating generic schema templates, the app detects a hotel's own website pages and builds Google-compliant JSON-LD structured data and an XML sitemap around the site's actual structure — so the output matches what is live, not a placeholder.

- Detects hotel website pages automatically and generates Google-compliant JSON-LD schema.
- Creates an XML sitemap from the same page data with one-click export.
- Supports multi-user accounts with project save/resume functionality.
- Built end-to-end: React/Vite front end, Turso database, deployed on Render.

PROFESSIONAL EXPERIENCE

Razib Marketing | SEO Specialist — On-site, Full-time

Dec 2025 – Present

- Lead SEO strategy for hospitality clients across the US, conducting technical audits, keyword research, and on/off-page optimisation tailored to the hotel industry.
- Manage Google Search Console and GA4 reporting, translating data into clear, prioritised action plans that improve organic visibility and support direct booking growth.
- Coordinate remotely with a US-based team to align SEO deliverables with broader campaigns spanning Google Search Ads, Display, and Social Media.
- Produce SEO-optimised content for hotel websites, OTA listings, and blog channels — maintaining each property's brand voice while targeting high-intent search queries.

Yellow Bee Marketing | SEO Specialist & Content Writer — Remote, Part-time

Dec 2025 – Present

- Manage end-to-end SEO and content planning for multiple client projects, ensuring consistent quality and on-time delivery.
- Translate client briefs into structured project roadmaps with clearly defined milestones and actionable task lists.

- Act as primary liaison between clients and internal web and design teams, maintaining clear communication throughout the project lifecycle.
- Produce website copy and social media content aligned with each client's brand voice, audience, and SEO objectives.

Times Research & Innovation Ltd. | SEO Specialist

Jul 2025 – Dec 2025

- Drove organic growth through comprehensive SEO audits, content gap analysis, and digital marketing strategies across client portfolios.
- Managed client reporting cycles, handled outreach initiatives, and mentored junior team members on SEO fundamentals.
- Maintained consistent and professional digital brand representation across all managed channels.

Almadina Abason Limited | Digital Marketer

Oct 2024 – Jun 2025

- Planned and executed performance-driven campaigns across SEO and Facebook Ads, with a primary focus on lead generation.
- Directed the creation of engaging visual content including motion graphics and promotional videos.
- Applied Python automation scripts to streamline data collection and accelerate campaign performance analysis.

Cocoa Lab Bangladesh | Digital Marketing Specialist

Jan 2023 – Jul 2024

- Owned the full SEO cycle — keyword strategy, on-page optimisation, content creation, link building, and performance tracking.
- Managed paid campaigns across Google Ads and Facebook Ads, leveraging analytics to continuously refine targeting and maximise ROI.

E-Comfy Solutions | E-commerce SEO Specialist

May 2022 – Jan 2023

- Led SEO operations for clients across Shopify, Etsy, and eBay platforms, improving product discoverability and organic rankings.
- Created SEO-optimised product and category content; monitored KPIs and delivered regular performance reports to clients.

SOFTWARE & AUTOMATION PROJECTS

Odd Job & Team Management System | React, Node.js, MongoDB

2024

- Built a full-stack workforce management platform with JWT/Bcrypt authentication and role-based access control.
- Integrated Stripe payment processing and team dashboards; deployed to production on MongoDB.

Office Lunch Management System | React, Node.js, Vercel

2023

- Developed an internal meal logistics tracker with automated daily reporting and multi-user management.

Automation & SQA Test Suite | Python, PyTest, Selenium

2024

- Mood-Based Music Recommender: Built a Python recommendation engine with comprehensive test coverage using PyTest, covering edge cases and input validation.
- Hotel Booking Automation: Developed a Selenium WebDriver framework covering end-to-end booking and checkout flows with automated assertions.
- Security Testing Module: Implemented automated login testing, brute-force prevention checks, and voice-password authentication logic.
